

declarations

*Means to register an Angular
Component, Pipe, or Directive on an
Angular Module.*

app.module.ts x

```
1 import { BrowserModule } from '@angular/platform-browser';
2 import { NgModule } from '@angular/core';
3
4 import { AppComponent } from './app.component';
5 import { CoreModule } from './core/core.module';
6 import { SharedModule } from './shared/shared.module';
7 import { AppRoutingModule } from './app-routing/app-routing.module';
8
9 @NgModule({
10   declarations: [ AppComponent ],
11   imports: [ BrowserModule, CoreModule, SharedModule, AppRoutingModule ],
12   exports: [],
13   entryComponents: [],
14   providers: [],
15   bootstrap: [AppComponent]
16 })
17 export class AppModule { }
```

declarations

- `declarations` accepts a set of `declarables` to be registered on the Angular Module.
- Doesn't accept:
 - `@NgModule`
 - `@Injectable`
 - A non-angular class
 - Declarable registered on any other Angular Module
- A declarable used in an Angular Module without adding it here would result in an error.
- Read more about the `declarations` array here.
