

providers

*Means to register a set of Injectable
Objects on an Angular Module.*

app.module.ts x

```
1 import { BrowserModule } from '@angular/platform-browser';
2 import { NgModule } from '@angular/core';
3
4 import { AppComponent } from './app.component';
5 import { CoreModule } from './core/core.module';
6 import { SharedModule } from './shared/shared.module';
7 import { AppRoutingModule } from './app-routing/app-routing.module';
8
9 @NgModule({
10   declarations: [ AppComponent ],
11   imports: [ BrowserModule, CoreModule, SharedModule, AppRoutingModule ],
12   exports: [],
13   entryComponents: [],
14   providers: [],
15   bootstrap: [AppComponent]
16 })
17 export class AppModule { }
```

providers

- `providers` accepts a set of injectable objects
- Adding these injectable objects here make it available in the injector of this `Angular Module`.
- Make dependencies available to inject in the `declarables` or services that are a child of this `Angular Module`'s injector.
- Read more about the `providers` array here.
